ark Tammo™

Say hello
to ark Tammo™

The world's most secure
push-button key safe

Why ark Tamo™?

A key safe is a metal box secured to an outside wall of your property, allowing you to conveniently store, share and organise keys. If you're looking for the best in key storage, **ark Tamo™** is the most secure push-button key safe on the market. Sharing access has never been easier.

A world-first multi-push keypad

ark Tamo™ has a multi-push mechanism which has taken code security to a whole new level.

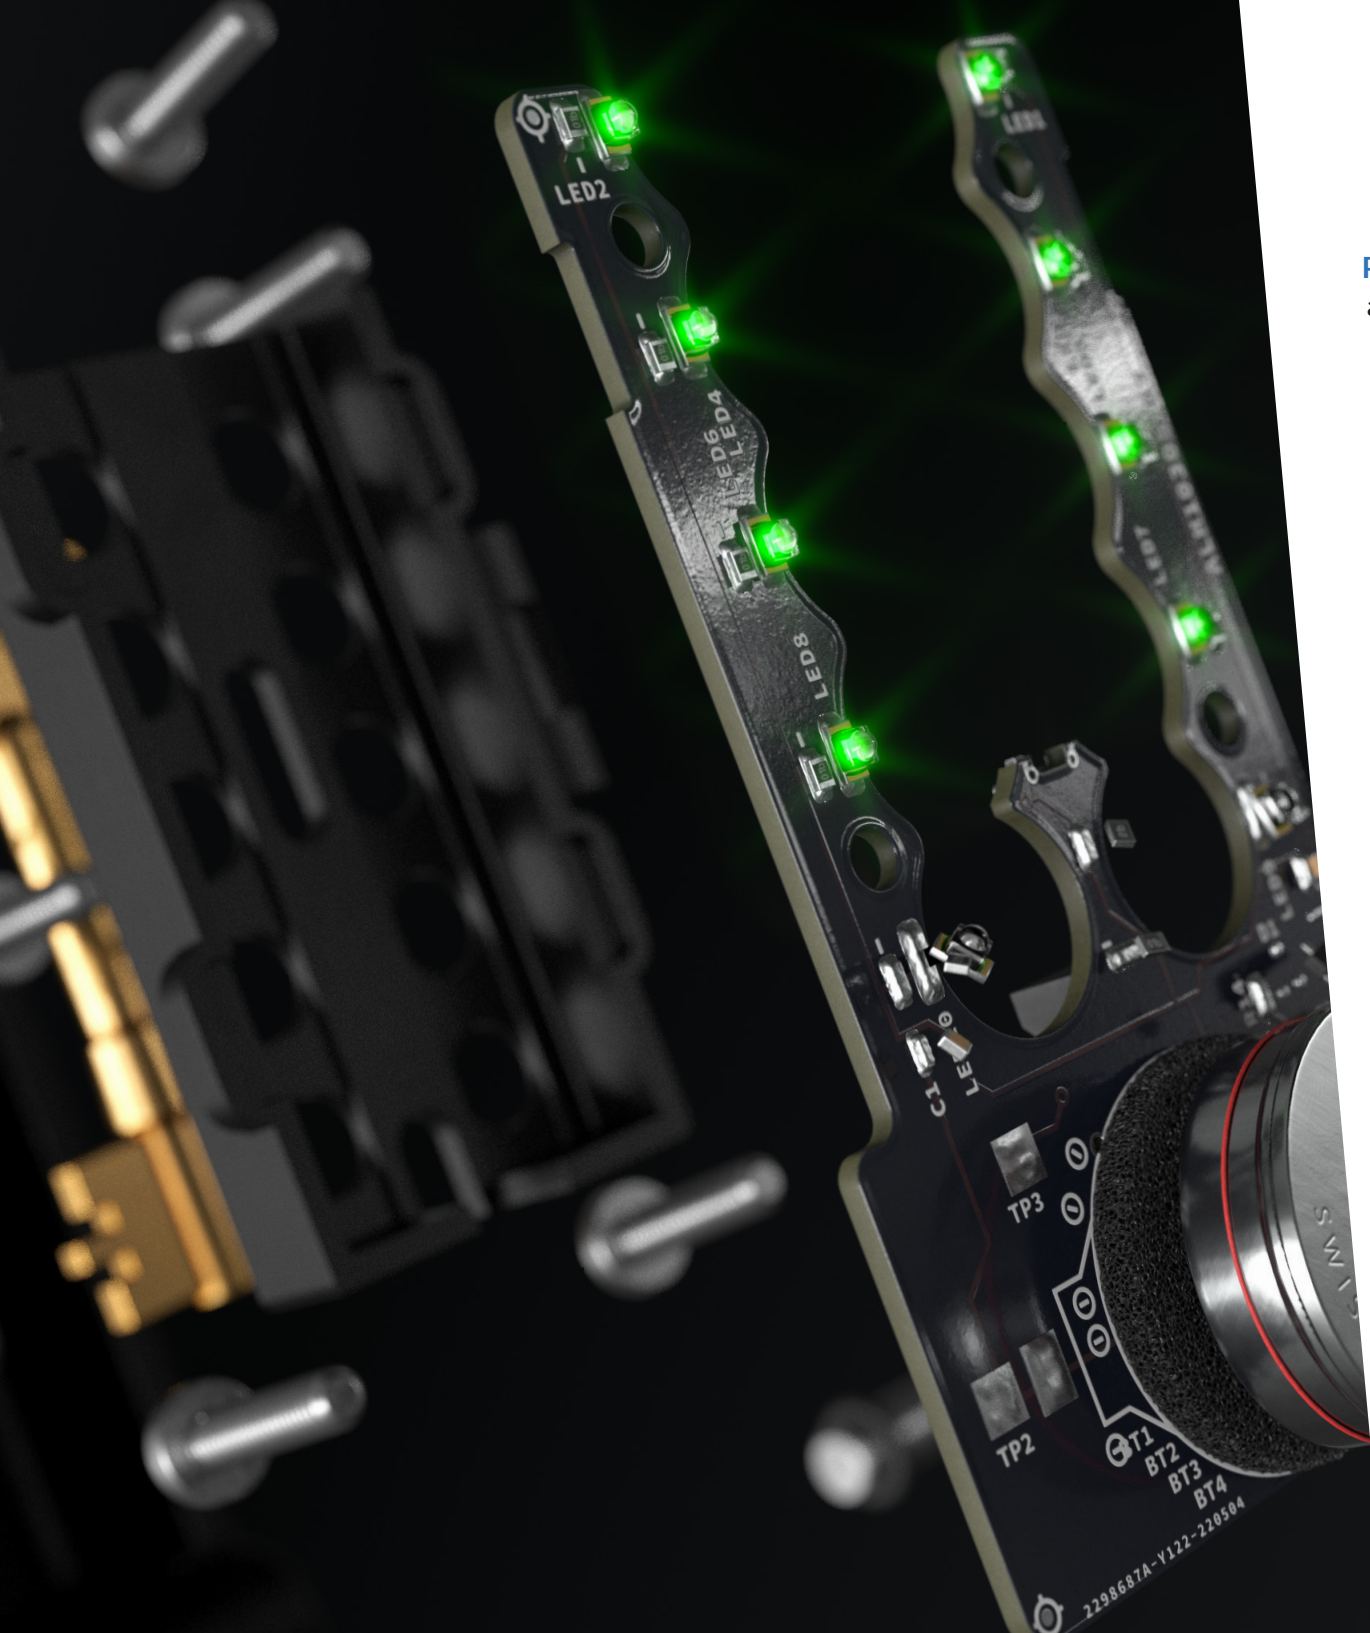

Our unique multi-push keypad means each digit can be used in a code up to 4 times, creating an impressive 9.7 million possible code combinations (we've done the maths). No other key safe comes even close.

It also means choosing a memorable code has never been easier. Thanks to the freedom of multi-push technology, you can pick a longer code that includes repeated numbers, allowing you to set one that you can easily remember.

Created for easy use

We've designed **ark Tamo™** with comfort in mind. The large, backlit easy-press buttons make using the key safe simple, even for the less dexterous. No more fiddly buttons – just effortless access.

Patented illumination technology

ark Tamo™ features a patented illumination module that lights up the easy-press buttons and the internal compartment - so you can come or go, night and day.

- Battery powered illumination - no wiring required
- Maximum visibility with large backlit buttons
- Fast, secure access to your home around the clock
- The key safe can be opened and closed without activating the lights

The highest security rating in its class

Featuring pioneering technology and built to industry leading security specifications, **ark Tamo™** is our most secure mechanical key safe, ever.

Certified by third-party security authorities, the Loss Prevention Certification Board and 'Secured by Design' (the official home security scheme from UK police), **ark Tamo™** is the world's first and only push-button key safe to have achieved the LPS1175 Issue 8 A10 attack security rating, making it the most secure key safe in its class.

LPS1175 Issue 8 A10
Ref 1004B

Official Police Security Initiative

Unlock greater freedom with **ark Tamo™**

Safely share keys with loved ones and service providers such as cleaners or dog walkers

Fast access for emergency services and carers without needing to answer the door

Peace of mind as a backup for lost keys, or if you are locked out

Securely store keys when exercising or enjoying the outdoors, night or day

Optional installation service

ark Tamo™ key safe can be easily installed by a competent DIY'er. If you would rather leave it to us, a nationwide installation service is available from The Key Safe Company for an additional fee.*

Our installers will contact you within 5-7 working days of receipt of your order to arrange installation.

*Available in the UK only. Some areas may not be covered. Please contact us to check availability.
